

## Duct Tape Wallet (continued)

3. Fold the sheet horizontally to resemble a wallet shape and tape the edges closed with 1" wide tape. Use scissors to trim the ends.

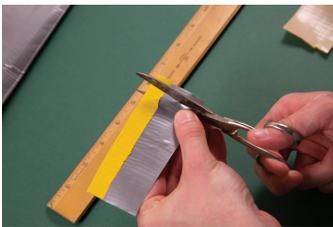

4. Make pockets.

- Cut (2) 5" strips of tape and press them together sticky side to sticky side.

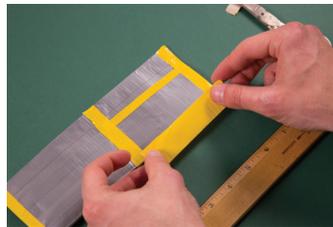

- Fold and tape a 1" strip of tape over the 5" edge. Trim the pocket to 4" long.

5. Add the pockets

- Fold the wallet in half to create a bi-fold wallet. Make sure the edges meet, then use your fingernail or a ruler to make a crease along the edge.
- Using ½" strips of duct tape, stick the pocket in place by taping the bottom seam and 2 side seams of the pocket onto one half of the wallet. Be sure to leave the top side open so you can fit a credit card inside.

- You can add more pockets to your wallet by repeating steps 3 and 4.
6. That's it! You just made a wallet completely out of duct tape!
